

Cleaning & care

Composter · Maintenance procedure

After every batch

 **Switch off before you clean. Wait until the blades stop.**

- 1 Clean the blower suction mesh with the brush.**
Remove dust and bits of compost. Clean mesh, clean air.

- 2 Wash the shredder blades with water.**
Do it while they are still wet, so nothing dries and sticks.

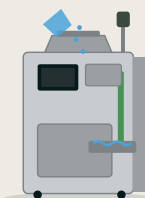

- 3 Scrape out stuck waste with the scraper tool.**
From between the blades. Never use your hands.

- 4 Clean the inside of the front door.**
Right after you take out the compost. Clean doors lock well and don't leak.

Every day

- 1 Wash the shredder with water.**
Use the cleaning tray, as in Daily use. This stops bad smells.

- 2 Keep the area around the machine clean and dry.**

Twice a month

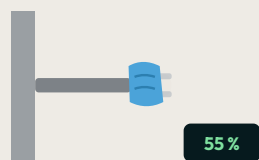

- 1 Clean the outside with D7 Diversey liquid.**
All the covers, the shredding area and the work area.

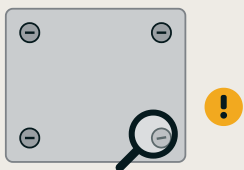

- 2 Wipe it clean with a soft cloth.**

 **Keep water and liquid away from the screen.**

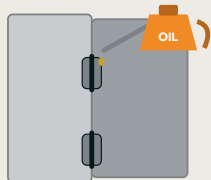

Regularly

- 1 Clean the moisture sensor.**
Switch off first. Not sure where it is? Ask us.

- 2 Look for loose screws and bolts.**
Found one? Tell us.

- 3 Oil or grease the door hinges.**

Your tools

- 1 You need only the mesh brush and the scraper tool.**
Spanners, the panel key and the programming cable are for our technicians.

 **Never open the control panel or touch the wiring. If you feel an electric shock, switch off the main MCB and call us at once.**
