

Start the machine

Composter · Startup procedure

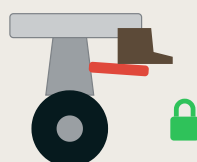

1 Wear gloves and safety glasses.

A dust mask and safety shoes too. No loose clothes or jewellery.

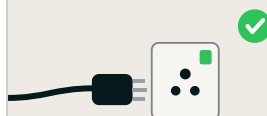

2 Check the machine stands on its mounts, not on its wheels.

If not, turn the damper nut to lower the vibration mounts.

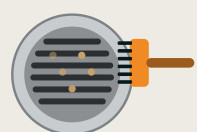

3 Lock the wheels.

The machine must not move.

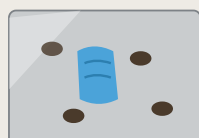

4 Push the power plug into the machine firmly.

It is the red plug that comes from the main MCB.

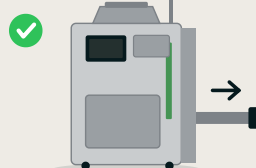

5 Clean the blower mesh with the brush.

Brush off all the dust.

6 Wipe the composting chamber clean.

Remove any dust or oil.

7 Check the cleaning tray is out.

It may still be in from the last cleaning. Take it out before you shred.

- 8 Put the shredder hopper tray in place.**
Seat it properly through the top door.

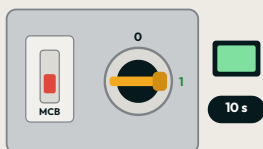

- 9 Close and lock all the doors.**

- 10 Switch on the main MCB.**

- 11 Turn on the key switch.**
It is at the back of the machine.

- 12 Wait 10 seconds.**
The screen starts and shows the start page.

⚠ Machine won't start? An MCB inside the control panel may be off. Do not open the panel. Call us.

⚠ Only one person runs the machine. Keep children and visitors away.

⚠ Never open the control panel or touch the wiring. If you feel an electric shock, switch off the main MCB and call us at once.
