

Daily use

Sorting table · Standard operating procedure

1 Tip a little waste onto the table.

Spread it out. Don't pile it high.

2 Pick out everything that is not food.

Plastic, glass, metal, cloth, paper cups, foil and stickers.

3 Drop the rejects down the chute.

They fall into the crate below.

4 Put sharp things in the hard box.

Pick them up with tongs. Never with bare hands.

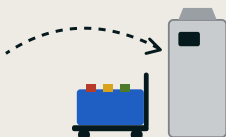

Never push your hand deep into a pile. Glass and needles hide inside. Spread it out first.

5 Put big, hard bones aside.

Small bones can go on. Ask us if big bones are OK for your machine.

6 Move only food waste on to the shredder.
